**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 23-43, and 50, drawn to method and apparatus for securing a metal part in a concrete part.

Group II, claim(s) 44-49, drawn to method for casting a hoisting feature.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The features common to Groups I and II, which are the steps of placing a body into a formwork, filling the formwork with concrete and removing the body to create a cavity wherein an elastomer material adjoins the concrete material, do not make a contribution over the prior art and therefore do not constitute a "special technical feature". See London Patent 682,320 (provided in IDS). See page 2, Col. 2.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement,

Art Unit: 4177

the election shall be treated as an election without traverse.
